PASSWORD SECURITY RECIPE

a good password can save the day

INGREDIENTS:

Letters, numbers & a bit of attention

INSTRUCTIONS:

Make it unique!

Use initials/final letters from fav songs, rhymes, quotes, books to make it longer, stronger & memorable. e.g.

Phrase: *The quick brown fox jumps over the lazy dog.*

Password: *Tqbfj0tld@26*

Mix it well!

Min 10 characters with a blend of numeric, alphanumeric, uppercase, lowercase with a pinch of special characters.

Keep it safe!

Use password managers & multifactor authentication wherever applicable.

EXPERT TIP:

Passwords turn stale quickly. Change them periodically or even at the hint of a suspicious activity.

VERDICT:

There's no scope for a bad password. Some things are better complicated!
